

POSITIVE PRESSURE VENTILATION SYSTEM

HEALTHY HOME THROUGH PROPER VENTILATION

INDOOR AIR QUALITY DOES MATTER

01

Poor indoor air quality is one of the biggest health threats in New Zealand

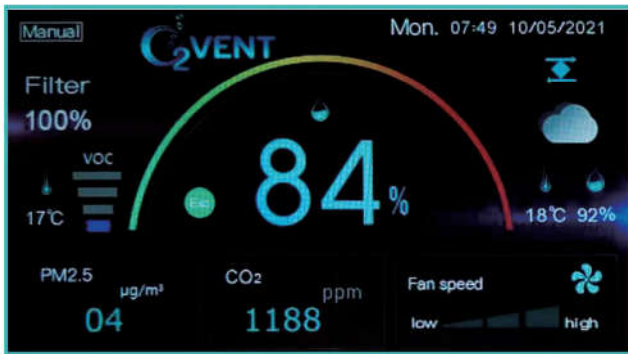

02

Nowadays tightly built homes trap many sorts of toxin inside of the house.

03

Many houses had been built with low standard, sometimes or always damp and had visible mould in the rooms.

Comfort Air Flow

The ventilation system is customized designed and installed for your home and provides comfortable air flow to maintain healthy indoor air quality.

Easy Filter Replacement

This system has a special designed filter box. If you like to do regular filter change by yourself, follow the instruction and replace it easily.

Energy Saving

This ventilation system has manual, auto, program timer and sleep operation modes, it provides demand air flow according to the current indoor air conditions to prevent system bringing over big air flow and energy lose. A ventilated dryer home is easier to warm up and save energy.

Child Lock

The Child Lock will help to prevent accidental operation and to prevent children from mis-operating the system.

Quiet Operation

3 speeds reliable and quiet inline duct fan will be installed in the roof cavity space, you can switch to the sleep operation mode in the evening.

WiFi Mobile Controller

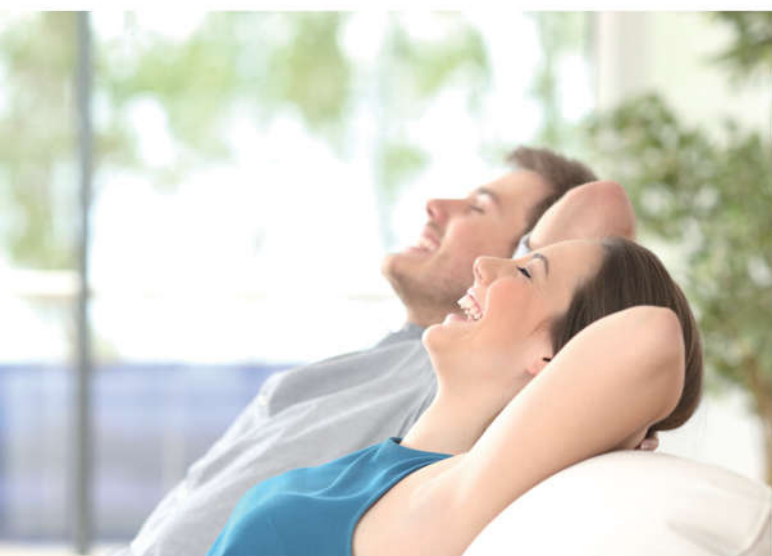

To manage the indoor air quality of your home by the mobile controller, you do not need to ask other people to look after your smelly home when you have a holiday. Anytime, anywhere, your home IAQ is under control.
